 Right Click

4 Programmable Buttons
 A downloadable utility allows custom programming of the receiver. Once programmed, the customized keys are available in any program on both Mac and PC computers without any software or drivers.

Navigation Ring
 360° Mouse
 Click Trigger™/Left Click

Auto RF™ Port
 Simply insert the receiver into the AutoRF port once to complete setup. It finds a clear communications channel and adjusts automatically.

The RemotePoint Jade offers a bright green laser pointer, full mouse functionality and presentation controls at ranges up to 150 feet.

In addition to dedicated presentation controls for Mac and PC, RemotePoint Jade offers four custom buttons which can be programmed to send a variety of key combinations.

Jade simplifies setup by using Auto RF, a frequency agile protocol to ensure reliable communication in today's electronically noisy environments.
