Presentation Slide Control

50' Range

Omni-Directional Operation

Integrated Laser Pointer

No Software Required

# RemotePoint<sup>™</sup> Navigator<sup>★</sup>

WIRELESS PRESENTATION CONTROL

Model: VP4100

**HIDE** When you need the audience to focus on you, hide your presentation with the press of a button. Press again and slides reappear.

**BACK** Return to the previous slide with ease.

**LASER** Highlight your key points with the integrated laser.

**FORWARD** Advance slides with one touch accuracy from up to 50 feet away.

## CONFIDENCE. CONTROL. CREDIBILITY.

Confidence and credibility are critical to successful presentations. RemotePoint<sup>®</sup> Navigator<sup>™</sup> puts slide control discretely in the palm of your hand. The compact size is comfortable to operate and raised icons identify options, even in the dark.

Every Navigator shares a unique code with its receiver, preventing interference from other remote controls. With up to 50 feet of wireless range, Navigator has no line-of-sight issues—allowing you to focus on your audience, not your slides. The result: confidence, credibility and the peace of mind that comes knowing that every slide will advance reliably, at the moment you command it to.

Not a computer wizard? You don't need to be. Just plug in the USB receiver, pick up the RemotePoint Navigator and start winning over the world—one audience at a time.
